

ANARCHY

So, I would apologise for the lack of this fine publication, but then we've been rather busy, what with marauding Sabbat packs, and this new threat coming in from the west coast. I know you guys all sit there and think that its an Anarch problem, that it only effects the Anarch Free States, but believe me, the heat we're feeling won't stop after its gained a little territory. If these fires ain't put out, they'll spread through America, and once they've scorched the States, they'll be spreading out to the "old country". Believe it. Don't worry. We will not run from this, or shirk our duty. What we ask of you is that aid us in some of these battles before the enemy is at your door.

Spider Jerusalem

Anyway, on to the meat of the issue I wish to bring up, for this Glasgow centric issue. Various things have wormed their way out of the city, and I feel it is time I put it together for you, the intelligent kindred of the world to think on.

I hear that the Sabbat presence has grown, and no-one seems to be getting anywhere with taking them out. I hear the Society of Leopold built up a strong presence in the city. I hear teh kindred were told to ignore them and hope they went away. I hear they built up, slowly pegging off a few stragglers, getting more and more adventurous until they attack one of your courts (walked in the front door I believe. Piss poor security guys). I hear there are still some in the city, though plans to discredit them without violence have been shot down.

Why has the situation been allowed to deteriorate so far? Is it weak leadership? Is it something worse? Consider this; who benefits from the chaos, and why. Who told everyone to leave the Society alone while they strode around picking kindred off? Who shuts down efforts to close Society actions on Glasgow? Who has used the chaos created by a Society to attempt to leash the city to his side? Who, when the Society attacked, walked out with a holy artefact? Where is it now? Who benefits from established kindred dying, to be replaced with strangers to the city? As chaos grips Glasgow I can think of one individual and one group.

Batholemew Murrillo and the Sabbat.

Antitribu? Are you sure?

Spider Jerusalem.
